

## React Native Developer

One Stream LTD is a software company, located in Plovdiv, Bulgaria. Our dedicated dev team has been working hard to create our own software product from scratch and keeps developing and updating it. Currently we are starting new own projects and we are welcoming new team members.

We're seeking a React Native developer who strives to get better to join our team! As a team member, you'll be rpart of the creating and maintaining innovative web applications. If you have some background in React Native, JavaScript, and a passion for creating user-friendly interfaces, we'd love to hear from you! Join us in crafting cutting-edge solutions and take part in exciting development projects. Apply now and be a part of our dynamic and collaborative work environment.

Requirements:

- \* Being passionate in developing web applications using React Native and Redux
- \* Knowledge in JavaScript, HTML, CSS, and related front-end technologies
- \* Demonstrated understanding of modern web development practices and tools
- \* Knowledge of responsive design principles and cross-browser compatibility
- \* Familiarity with RESTful APIs and asynchronous request handling
- \* Ability to write clean, modular, and efficient code while adhering to coding standards.
- \* Experience with version control systems like Git is a plus
- \* Strong problem-solving skills and the ability to debug and troubleshoot issues effectively
- \* Collaborative mindset with excellent communication and teamwork abilities
- \* Ability to manage one's own time effectively
- \* Constantly staying updated with the latest trends and technologies in the React ecosystem
- \* Any additional knowledge in other front-end frameworks or back-end technologies is a plus.
- \* A portfolio or GitHub repository showcasing previous projects and code samples would be highly appreciated
- \* Openness to learn and adapt to new technologies and challenges in a fast-paced environment.
